

AAI Attribute Specification

Updates for the next version

SWITCH

Serving Swiss Universities

Patrik Schnellmann

patrik.schnellmann@switch.ch

Bern, 16. September 2009

Overview of changes for the next version

- Compatibility with eduPerson attribute specification
- Deprecation of Attributes
- New Organizations, more HomeOrgTypes?
- New attribute eduPersonCardUID

eduPerson

Goal

Bring our specification in line with latest eduPerson specs

eduPerson attributes not in our Attribute Specification:

- eduPersonNickname

 - ...PrimaryAffiliation

 - ...PrimaryOrgUnitDN

 - ...PrincipalName

 - ...ScopedAffiliation

 - ...TargetedID

 - ...Assurance

Deprecation of Attributes

None of the IdPs support:

- eduPersonOrganizationalUnitPath
- ... but the attribute is defined

Proposition:

Change the “implementation status” to “deprecated”.

More values for HomeOrgType Attribute?

- Values currently allowed for HomeOrgType: university, uas, hospital, library, who, others
- Research labs currently use “others”
- Other federations have organisations such as primary, secondary and high schools
- Which granularity would be useful?

New Attribute swissEduPersonCardUID

- Attribute for unique identifier on a card (e.g. RFID card)
- Currently used locally between EPFL and Uni Lausanne
- Examples:
 - "E002219C5298303B@ISO15693"
 - "0298450109348@unil.ch"
