## AAI Attributes

Thomas Lenggenhager, <[lenggenhager@switch.ch](mailto:lenggenhager@switch.ch)>

# Directories within a AAI Home Organization

- **Authentication System**
  - any Apache compatible authentication method:  
**LDAP, PAM, RADIUS, TACACS, end-user certificates, Web SSO (e.g. Pubcookie), ...**
  - any Tomcat compatible authentication method:  
**e.g. Web SSO (CAS)**
- **Integration with User Directory via Java APIs**
  - **LDAP via JNDI**
  - **Databases via JDBC**

→ Login name is the link between the two parts

SSO = Single Sign On

# Authorization Attributes

- AAI transfers user attributes from a Home Organization to a Resource
  - Requires a common understanding of what a value means
    - ➡ Authorization Attribute Specification v1.1  
[http://www.switch.ch/aai/docs/AAI\\_Attr\\_Specs.pdf](http://www.switch.ch/aai/docs/AAI_Attr_Specs.pdf)
- A task force selected the attributes for SWITCHaa!
  - minimal set to start with
  - attributes with pre-existing ‘common understanding’
  - in line with foreign activities
- Descriptions are LDIF like, but use of LDAP not required

# Authorization Attributes (2)

## Personal attributes

- Unique Identifier
- Surname
- Given name
- E-mail
- Address(es)
- Phone number(s)
- Preferred language
- Date of birth
- Gender

## Group membership

- Name of Home Organization
- Type of Home Organization
- Affiliation (student, staff, faculty, ...)
- Study branch
- Study level
- Staff category
- Group membership
- Organization Path
- Organizational Unit Path

- study branch, study level, staff category are based on SHIS/SIUS
- username and password are missing  
⇒ only used locally!
- commonName is missing  
no common understanding on how to use it

- If no JavaScript: additional click necessary**

# Supported Servers for Target Installations

The Swiss Education & Research Network

## Server OS

- Windows NT, 2000, XP, 2003**
- Linux (any blend)**
- Solaris**

## Web Servers

- Apache 1.3.x**
- Apache 2.x**
- IIS 4.x, 5.x, 6.x**

# Supported Applications

- Static content on Apache or IIS
- Applications (PHP, Perl, ..) running on Apache
- JAVA-web-applications via mod\_jk and Apache
- List of other „shibboleized“ applications at  
<http://shibboleth.internet2.edu/seas.html>

* Apple Quicktime Streaming Server	* JSTOR
* ArtSTOR	* Napster
* Blackboard	* NSDL
* CSA	* OCLC
* eAcademy	* Ovid Technologies Inc.
* EBSCO Publishing	* Proquest Information and Learning
* Elsevier ScienceDirect	* SYMPA
* ExLibris – SFX	* TWiki
* EZProxy	* Web Assign
* Fedora	* WebCT
* Gale	* Zope4Edu
* Higher Markets

# Server Certificates

Ueli Kienholz, <[kienholz@switch.ch](mailto:kienholz@switch.ch)>

# Why are Server Certificates important ?

The Swiss Education & Research Network

## SWITCHpki Service

The SWITCHpki Team

[pki@switch.ch](mailto:pki@switch.ch)

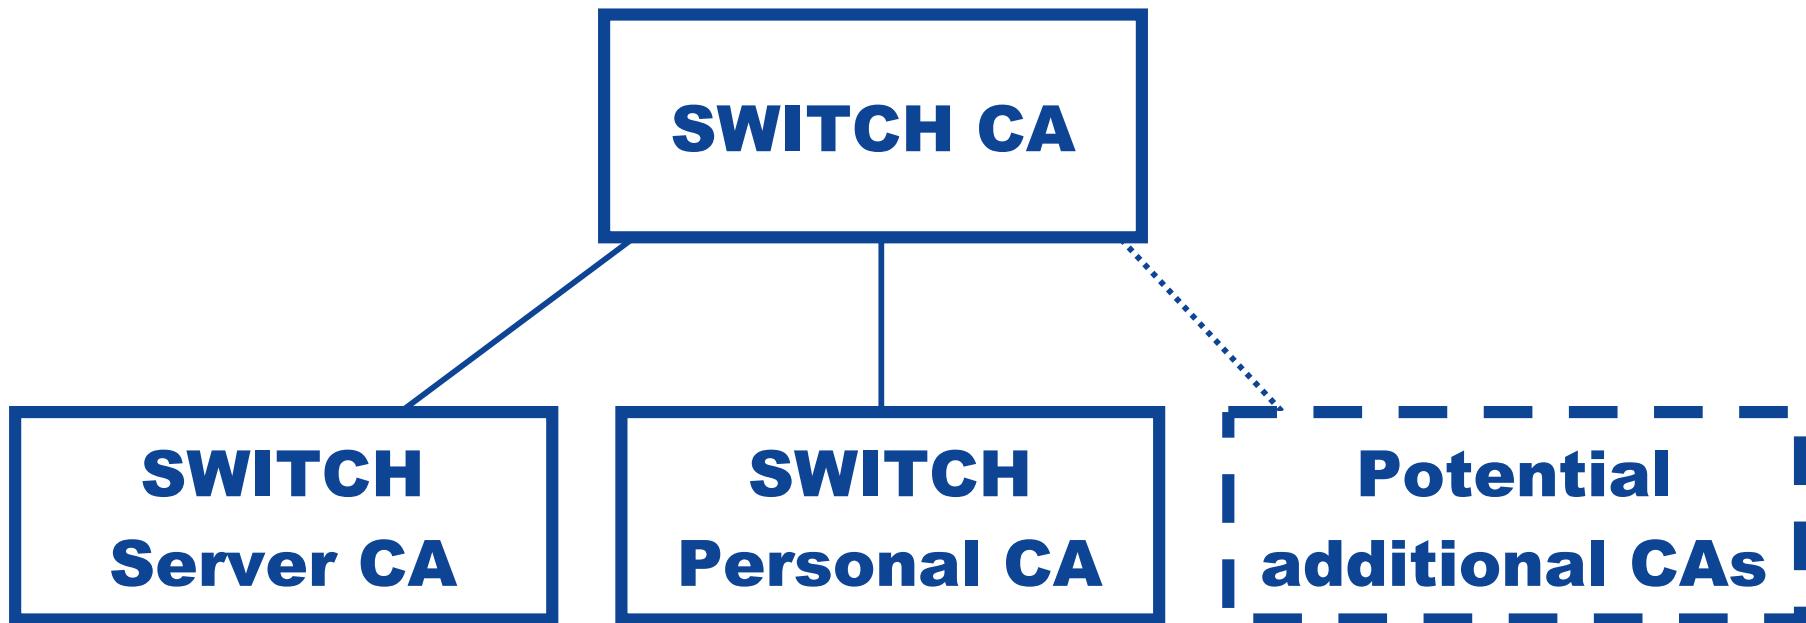

<http://www.switch.ch/pki/>

## Motivation for SWITCHpki

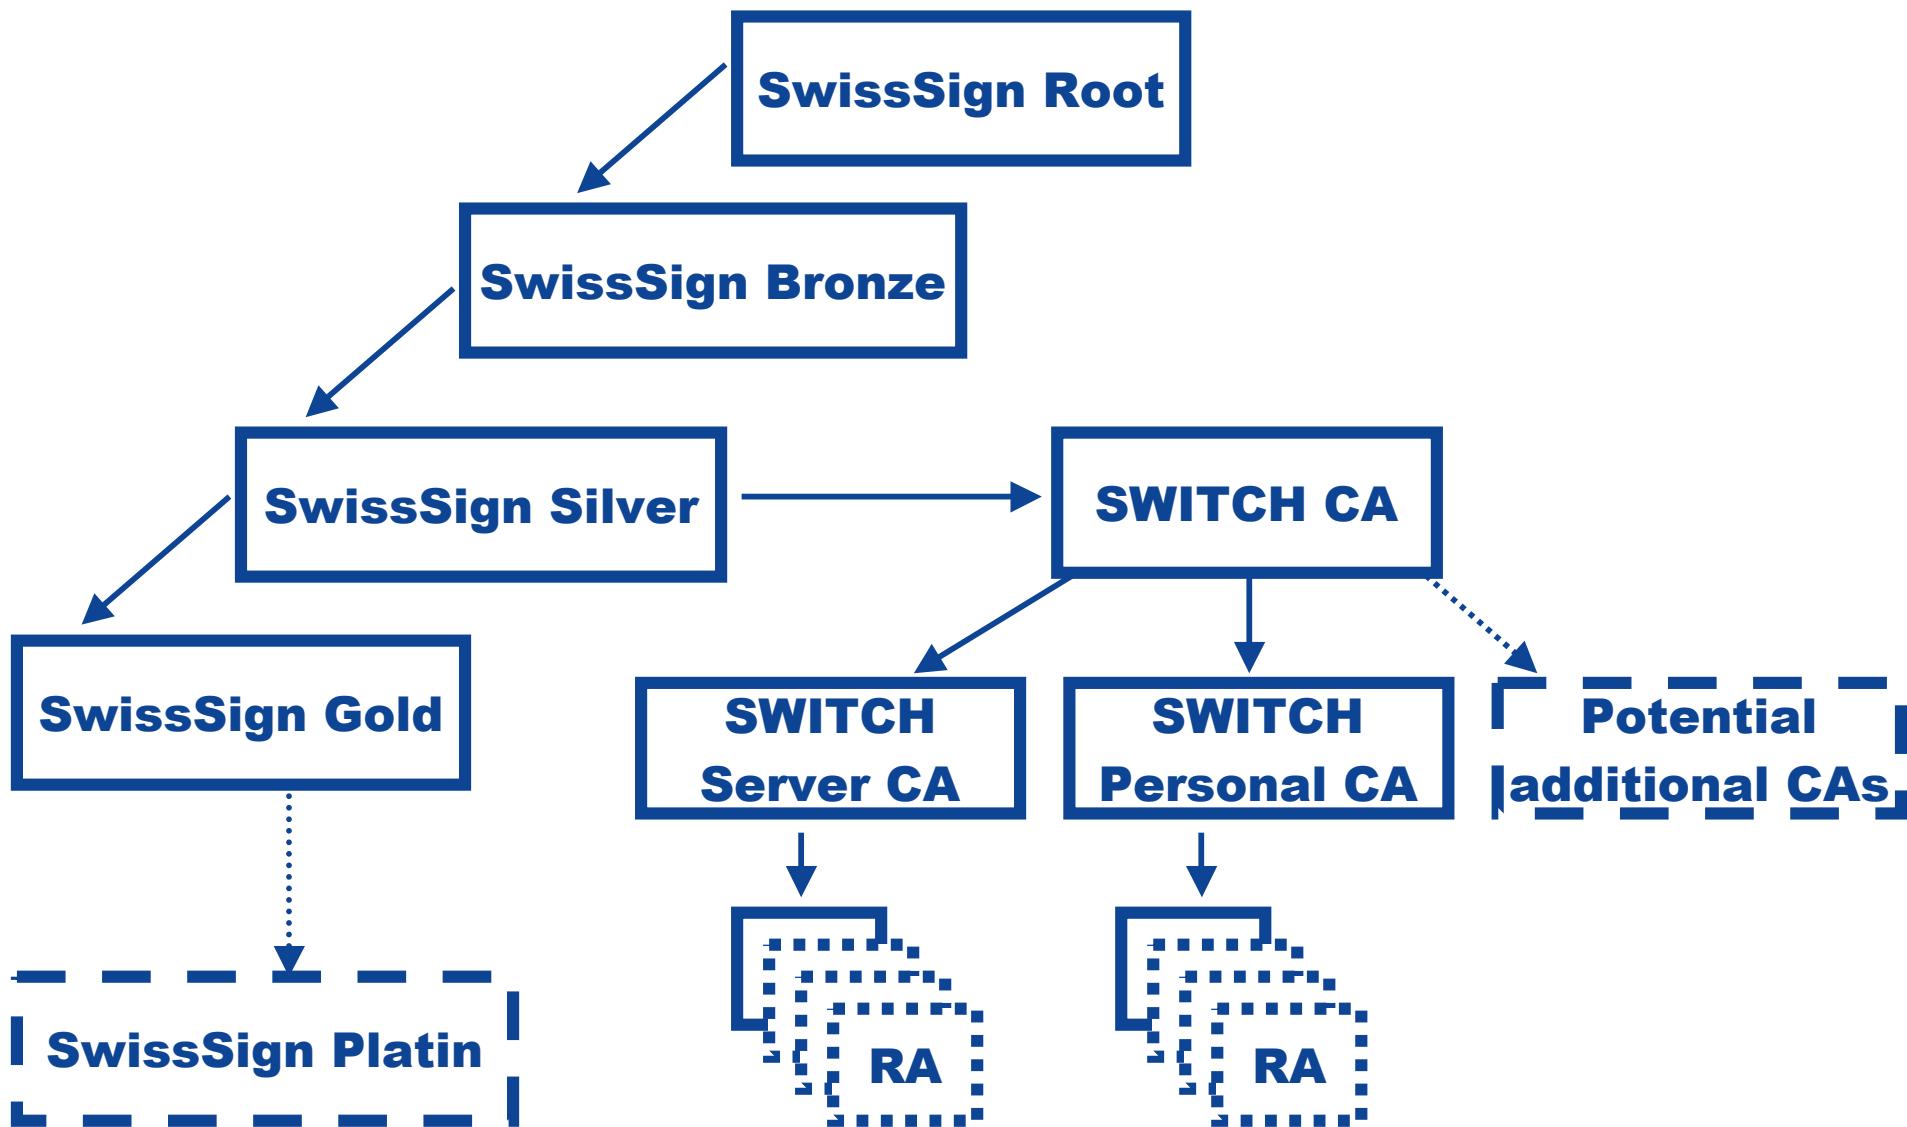

- Requirement of AAI Project: server certificates protecting backend communication
- PKI initiatives within our community could benefit from a common service

## What happened so far?

- AAI-TF-CA: Taskforce within AAI project
- Produced a CP/CPS draft, recommending SWITCH to make a service out of it
- SWITCH took this up, engaged SwissSign as consultant and potential outsourcing partner and drafted a new CP/CPS
- Result rediscussed in AAI-TF-CA and made into the service being presented today

# CA Structure SwissSign & SWITCHpki

## Correctness of information

- Included information must be correct
- E.g. no nicknames, pseudonyms need to be marked as such

## Verifiability of information

- Included information must be verifiable and meaningful
- E.g. organisation names must be registered somewhere

## Auditability

- All contents of signed information in certificates must be supported with some form of documentation attainable in reasonable time (e.g. during an audit)

### Participating Organisations

As stated in 3.2.2 of the CP/CPS the authentication of an organization identity has to be proven. Academic organisations are not necessarily listed in the Central Business Names Index ([Zefix](#)), therefore participating organisations must be listed in the table below.

In addition, the relevant 'O = ' subject entry is listed as well, based on 3.1.4 'Rules for interpreting various name forms' of the CP/CPS.

ETH Swiss Federal Institute of Technology Zurich O = ETH Swiss Federal Institute of Technology Zurich
Fachhochschule Aargau Nordwestschweiz O = Fachhochschule Aargau Nordwestschweiz
SWITCH - Teleinformatikdienste für Lehre und Forschung O = SWITCH - Teleinformatikdienste fuer Lehre und Forschung
Universität Bern O = Universitaet Bern
Université de Fribourg - Universität Freiburg O = Universite de Fribourg - Universitaet Freiburg
Université de Lausanne O = Universite de Lausanne
Universität Zürich O = Universitaet Zuerich

current list available at: <http://www.switch.ch/pki/participants.html>

# SWITCHpki Participants & Contacts

Site	Contact Person(s)
ETH	Dolores Parravicini Brigitte Malacarne
Fachhochschule Aargau	Martin Sorg
Universität Bern	Christian Heim Roland Trummer Peter Geiser
Université de Fribourg	Bruno Vuillemin
Université de Genève	Dominique Petitpierre
Université de Lausanne	Alexandre Roy
Universität Zürich	David Meier, Jann Forrer Luzian Scherrer ,Roberto Mazzoni

# Request a Certificate

The screenshot shows a Mozilla Firefox browser window with the title bar "SWITCH - PKI - Manage Certificates - Mozilla". The address bar displays "http://www.switch.ch/pki/manage.html". The main content area is titled "Manage Certificates". On the left, there's a sidebar with a "Security" section containing links to "Incident Handling", "Services", "Security-WG", and "Links". The main content area includes sections for "Download/Import CA Certificates & CRLs" (with links to "SwissSign Root Certificate" and "SWITCH CA Certificate"), "Certificate Revocation Lists (CRL)" (with links to "SWITCH Server CA CRL" and "SWITCH Personal CA CRL"), and "Request & Maintain Certificates" (with links to "Request Certificate", "Renew Certificate", and "Revoke Certificate"). At the bottom, there's a footer with copyright information ("© 2004 SWITCH | Contact | Disclaimer | 12.03.2004") and a search bar.
