The Swiss Education & Research Network

AAI & WebCT, AAIportal

Ueli Kienholz, <kienholz@switch.ch>

Why AAI for SVC-Projects ?

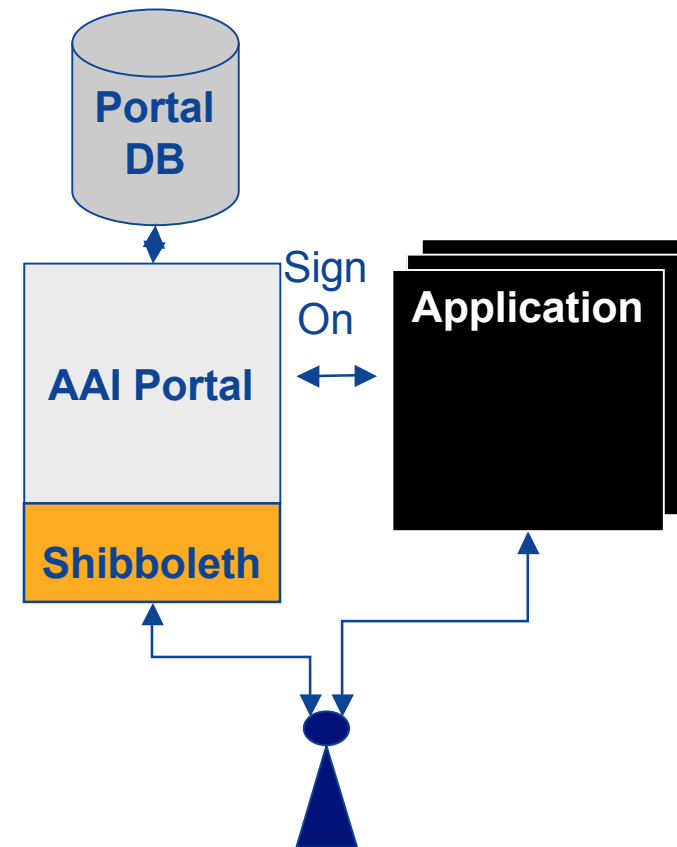

- ❑ **Inter-institutional AA-demand (courses have to be available to the project partners)**
- ❑ **(almost) no non-AAI users**
- ❑ **Authorization policy in many cases quite simple (can be mapped to standard SWITCHaai attributes)**

The AAIportal

- ❑ Originally developed by IAM at Uni Bern
- ❑ Since 2004 maintained by SWITCH
- ❑ Further developed by IAM & SWITCH
- ❑ Open-Source project
<http://aai-portal.sourceforge.net/>

- Portal Functionality
- Authentication Gateway
- User Management
- Adaptors to “Black boxes”

WebCT CE (Campus Edition)

- Current Version: 4.1
- Based on Perl/DB
- Single Institution
- In use at many Swiss Unis

WebCT Vista

- Current Version: 3.0
- Based on Java/Oracle
- Multiple Institutions
- 1 Installation operated by Edutech/SWITCH

AAI-enabling WebCT Servers
